February 24, 2025

I am writing to express the strong support of the Department of Mathematics for your proposal for a new degree program in Artificial Intelligence.

The Department of Mathematics approves including the following courses in the upcoming Bachelor of Science in Artificial Intelligence degree program:

BSAI 220	Measuring Preferences and Rankings
DATA 250	Discrete Mathematics
MATH 140	Calculus I
MATH 141	Calculus II
MATH 240	Introduction to Linear Algebra
STAT 400	Applied Probability and Statistics I

This support is given with the provision that the Department of Mathematics cannot support an increased number of students with its current resources. To support the projected number of students, our estimate is that we will need to hire 5 additional faculty members (TTK/PTK) and 15 graduate assistants.

Sincerely,

A handwritten signature in blue ink, appearing to read "Doron Levy".

Doron Levy  
Distinguished Scholar-Teacher  
Professor and Chair, Department of Mathematics
